1 Ada 95 as implementation language for object-oriented designs   85%
Stéphane Barbey
Proceedings of the conference on TRI-Ada '95: Ada's role in global markets: solutions for a changing complex world November 1995

2 ROMAN-9X: a technique for representing object models in Ada 9X notation   85%
Gary J. Cernosek
Proceedings of the conference on TRI-Ada '93 October 1993

3 A structural view of the Cedar programming environment   82%
Daniel C. Swinehart , Polle T. Zellweger , Richard J. Beach , Robert B. Hagmann
ACM Transactions on Programming Languages and Systems (TOPLAS) August 1986
Volume 8 Issue 4
> This paper presents an overview of the Cedar programming environment, focusing on its overall structure—that is, the major components of Cedar and the way they are organized. Cedar supports the development of programs written in a single programming language, also called Cedar. Its primary purpose is to increase the productivity of programmers whose activities include experimental programming and the development of prototype software systems for a high-performance personal computer. T ...

4 A PDP-8 emulator program   82%
Brian J. Shelburne
Journal of Educational Resources in Computing (JERIC) March 2002
Volume 2 Issue 1
> The clean, simple, and elegant architecture of the classic PDP-8 makes it an ideal candidate for studying concepts in computer organization. The PDP-8 emulator program allows a user to write, edit, assemble, debug, trace, and execute PDP-8 machine code and PDP-8 assembler language programs. With it, the user can obtain a feel for the PDP-8. The PDP-8 emulator program includes a simple built-in text editor which is used to write and edit PDP-8 assembler language programs, an assembler to translat ...
